-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/15/05 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 4,770,451 to Souza.

After careful re-consideration of the reference, it's apparent that the magnet (142) is inserted in an area that is directly adjacent to the bolt, directly adjacent the strike plate and directly adjacent the door (when the device is arranged as shown in its door-locking position), even though the magnet may not be functionally required for the locking process. The law of anticipation requires that a distinction be made between the

Art Unit: 3676

invention described or taught and the invention claimed. It does not require that the reference "teach" what the subject patent teaches. Assuming that a reference is properly "prior art," it is only necessary that the claims under consideration "read on" something disclosed in the reference, i.e., all limitations of the claim are found in the reference, or "fully met" by it. *Kalman v. Kimberly-Clark Corp.*, 218 USPQ 789.

Otherwise, one of ordinary skill in the art would recognize other broadly-recited steps to be taught by the reference where any of the protruding (with respect to its installed position) parts of the lock anticipate "handle" limitation and are intended to be used for handling the lock in its intended use.

As regards claims 12,13, either of the large holes on left right sides (as shown in Fig 6, or the upper and lower fastener holes (on right side) read on "pair of apertures" limitation.

Allowable Subject Matter

4. Claims 7-10 are allowed.
5. It is suggested that the 'two pairs of apertures at one end' limitation be added to claim 11 as part of step of inserting for example.

Response to Arguments

6. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
